

WORLD AIDS DAY

The Albany County Department of Health and community partners observe World AIDS Day at the Empire State Plaza, Albany, New York, on Wednesday, December 4, 2013.

The national theme - **“Working Together for an [AIDS-Free Generation](#)”** highlights the promise of prevention efforts that help stop the spread of HIV.

TWO GOOD REASONS TO HAVE AN HIV TEST:

1. If you're not infected, you can learn how to stay that way.
2. If you are infected, new treatments can keep you healthy.

CONFIDENTIAL HIV AND STD TESTING

For HIV/AIDS and STD information, referrals or information on how to get tested at low or no cost, contact your local health department or the regional program closest to the county you live in.
