Month at 2:00pm**
(Open to the public)

NYS Grown and Certified Partners with Agricultural Environmental Management - It's Good Business

The New York State Grown and Certified program launched in 2016 to help meet the growing consumer demand for high quality foods grown or produced to a higher standard within New York State. To be a part of the of New York State Grown and Certified program, participating farmers and processors, must meet food safety standards that pertain to specific commodities, such as GAP (Good Agricultural Practices), while also meeting the required environmental standard by participating in an AEM (Agricultural Environmental Management) assessment. Commodities that are currently accepted into the NYS Grown and Certified Program include produce, dairy, eggs, beef, poultry, pork, oysters, Christmas trees and maple products.

Soil and Water Conservation Districts (SWCDs) lead in the implementation of the AEM program. AEM is a voluntary, confidential, locally-led, and comprehensive approach that further advances environmental management on New York's farms, across all sizes and commodities. This program delivers technical support and financial incentives needed to help farmers to implement conservation practices critical to the protection of water quality and other natural resources. AEM helps to

ensure that New York's farms remain viable and continue to meet their business objectives in an ever-changing market place. Over the last two decades, over 12,000 farms across New York State have participated in AEM by working with local SWCDs and partnering with resource professionals, to develop and implement comprehensive, farm-specific plans using AEM's 5-Tier approach.

- Tier 1:** Inventory current activities, and future plans of the farm business.
- Tier 2:** Assess current environmental stewardship and opportunities for improvement.
- Tier 3:** Develop conservation plans addressing concerns and opportunities tailored to farm goals.
- Tier 4:** Implement plans utilizing available financial, educational, and technical assistance.
- Tier 5:** Evaluate practices and plans to ensure the protection of farm viability and the environment.

The New York State Grown & Certified program requires an AEM Tier 2 assessment. Completing this step provides farms the opportunity to become more engaged with the AEM program, often leading to further work through the Tiers to address farm and natural resource needs. Advancing through the AEM Tiers, opens

Please like "Albany County Soil and Water Conservation District" on Facebook and follow @AlbanySWCD on Twitter for up to date program information and announcements

Rain Barrels are available at the District Office. Feel free to stop in and take a look.

Annual Tree and Shrub Sale

The District staff members have been busy planning the 2018 Spring Tree and Shrub Program. All species that are offered are ideal for conservation practices such as erosion control, wind-breaks, shade, sound barriers, wildlife food/cover as well as backyard homesteading.

New this year we are offering Dawn Redwood, White Flowering Dogwood, and Pee-Gee Hydrangea. Delivery within Albany County is still an option, for a

nominal fee. An order form is enclosed in this newsletter along with a general tree description page.

Additional items will be available for purchase during the pickup. Items include tree tubes in various sizes, tree guards, wildlife boxes and rain barrels.

District staff members can offer advice and maps on soil types, which can help determine what to plant and where. Available this year is a large variety of conifers, deciduous trees and shrubs as well as fruits and berries that can help the backyard enthusiast get conservation on the ground and enjoy the fruits of all that labor. Incorporating fruit trees and bushes into your backyard can be a healthy, cost effective way to grow fruits and berries right in your own backyard with only a small foot print.

Preorder your plants by April 6, 2018. Place your orders early to ensure species availability, you do not want to miss out. Please note that you do not need to be an Albany County resident to order through this sale. Feel free to contact the office at 518-765-7923 with any questions.

NYS Grown and Certified - Continued

(Continued from page 1)

doors for farms to apply for cost-share funding to implement priority practices, by advancing to the Tier 3 planning process. AEM takes a whole farm view to address not only nutrient management, but also addresses farmstead water supplies; pasture management; pesticide mixing, loading and storage; erosion control; stream and floodplain management; irrigation water management; and soil health to name a few. AEM can also address farm-to-neighbor relations and agriculture in the community. In today's climate of environmental awareness, AEM's technical and financial resources are valuable to assist farmers in maintaining their commitment to conservation. Proactively advancing conservation practices is central to economic viability on today's farms. All farms that are enrolled in the NYS Grown and Certified Program are encouraged to partner with their local SWCD to work further through the AEM Tiers, if they've not already done so. Any farm can participate in AEM, without necessarily participating in the New York State Grown and Certified program.

Soil and Water Conservation Districts continue their long record of leading and implementing AEM with farmers at the county level, supported by statewide leadership from the Department of Agriculture and Markets and the NYS Soil and Water Conservation Committee. To learn more about AEM, contact us at acswcd@gmail.com, or visit www.nys-soilandwater.org. For more information about the NYS Grown and Certified program, visit <https://certified.ny.gov>

Soil & Water Conservation District of Albany County 2018 Annual Spring Tree and Shrub Sale

All orders are first come first served, so order early to guarantee your order! Supplies are limited! Order deadline: **April 6, 2018**

Call or email after this date for product availability

Pick up dates : April 27, 2018 - 8am to 6pm and April 28, 2018 - 8am to 11am

All plants are bareroot stock and are sold only in bundles of the specified quantities

General Tree Descriptions

Species	Description	Ideal Site Conditions	Uses
Conifer			
White Cedar	40-60' tree	Full sun, well drained soil	Windbreak, wildlife use
Balsam Fir	45-75' tree	Prefers well drained moist soils, more shade tolerance than other firs	Windbreak & wildlife use
Concolor Fir	30-50' tree	Prefers deep, rich, moist, well-drained soils, no heavy clays	Windbreak & wildlife use
Douglas Fir	40-80' tree	Neutral or slightly acidic, well drained, moist soils	Wildlife use, Christmas tree
Fraser Fir	30-40' tree	Prefers moist, well drained loam soils, sun or partial shade	Wildlife use, Christmas tree
White Pine	50-80' tree	Moist well drained fertile soil, full sun	Windbreak, wildlife use, & timber
Dawn Redwood	70-100' tree	Prefers moist, deep, well-drained soils	Wildlife use
Colorado Blue Spruce	30-60' tree	Prefers rich, moist soil, full sun, very adaptable	Windbreak, wildlife use
Norway Spruce	40-60' tree	Moderately moist, well drained soil, full sun	Windbreak, wildlife use
Deciduous			
Black Tupelo (Gum)	30-50' tree	Well drained soil, prefers slightly acidic soil	Wildlife use
Eastern Redbud	20-30' tree	Full sun or light shade, various soil conditions	Wildlife use
Forsythia	8-10' shrub	Prefers loose soil, but does well in any type, best in full sun	Wildlife use & screening
Hydrangea - PeeGee	10-12' shrub	Fast growing, prefers full sun	Wildlife use
Lilac - Common	8-15' shrub	Well drained to moist neutral soil, full sun	Screens, windbreaks & wildlife use
Red Osier Dogwood*	7-9' shrub	Prefers wet or swampy conditions	Erosion control & riparian buffers
Shagbark Hickory*	100' tree	Prefers sun, deep moist soils, has superior drought tolerance, slow growing	Wildlife use, shade, & timber
Sugar Maple	60-75' tree	Prefers well drained moist fertile soil	Wildlife use & timber
Tulip Tree	70-90' tree	Well drained soil, prefers slightly acidic soil,	Wildlife use & riparian buffers
White Flowering Dogwood*	15-20' small tree	Prefers partial shade, not pollution tollerant	Wildlife use
Winterberry	18-24' shrub	Grows in wet areas near ponds, or wet woods	Wildlife use, erosion control
Fruits & Berries			
Apple	10-15' Semi Dwarf Tree	Full sun, well drained soil	Wildlife use
Blackberry	5' spreading shrub	Prefers full sun, well-drained soils	Wildlife use & erosion control
Blueberry - Highbush	6-12' shrub	Acidic soil, full sun	Wildlife use
Cherry	25-35' tree	Full sun, well drained, sandy soil, not drought tolerant	Wildlife use, backyard homesteading
Elderberry*	5-12' shrub	Tolerates wet soil & roadside conditions, best in full sun	Wildlife use, Backyard Homesteading
Peach	12-15' tree	Prefers full sun, well drained soils	Wildlife use
Pear	12-20' Semi Dwarf Tree	Prefers moist, well drained soils, full sun	Wildlife use
Plum	15-20' Semi Dwarf Tree	Prefers well drained soil, full sun	Wildlife use
Red Raspberry	3-5' spreading shrub	Prefers full sun and deep well-drained soils	Wildlife use
Ground Cover			
Hosta	18-22"	Best in well drained soil, part shade to full sun	Erosion control & wildlife use
Sedum Dragon's Blood	4-6"	Prefers full sun but is shade tolerant	Erosion control
Conservation Pacs			
The following species are included in one of the conservation pacs along with those marked with *			
American Cranberry	8-12' shrub	Sun to partial shade, well-drained, moist soil	Wildlife use & screening
Black Chokeberry	5-8' shrub	Full/partial sun, prefers moist, well-drained soils	Erosion control & wildlife use
Black Walnut	50-70' tree	Prefers deep rich moist soil	Wildlife use & timber
Buttonbush	3-6' shrub	Prefers wet conditions - bordering streams and lakes	Riparian buffers
Chinquapin Oak	40-50' tree	Prefers well drained soils, full sun/part shade	Wildlife use
Hybrid Poplar	100' tree	Rapid growing, wet tolerant	Windbreak & shade
Juneberry	10-18' shrub	Tolerates harsh climates, full sun/partial shade	Wildlife use & windbreak
Ninebark	5-9' shrub	Tolerant of a wide range of soil, full sun	Wildlife use
Red Oak	60-75' tree	Sandy well drained acidic soil, full sun	Wildlife use & timber
River Birch	40-70' tree	Tolerant of both wet and dry soils, full sun	Wildlife use & shade
Sawtooth Oak	35-45' tree	Prefers acid, well drained soils, drought tolerant	Wildlife use
Silver Maple	50-70' tree	Tolerates a wide range of soil conditions, prefers full sun	Shade & wildlife use
Sycamore	75-100' tree	Fast growing, prefers moist soil	Windbreak & Riparian Buffers
White Willow	50-80' tree	Moist soil, full sun to partial shade	Windbreaks, wildlife, & riparian

Spring Fish Sale 2018

Albany County Soil & Water Conservation District

(518) 765-7923

ORDER DEADLINE : Friday, May 11, 2018

PICK-UP : Friday Morning, May 18, 2018 : you will receive notification of your time slot

Species	Price	Quantity Ordered	Total Cost
4-6" Largemouth Bass	\$2.85 each		\$
6-8" Channel Catfish	\$1.95 each		\$
4-6" Rainbow Trout	\$2.35 each		\$
Fathead Minnow (forage fish)	\$18.00/100		\$
Subtotal			
8% sales tax			
Triploid Grass Carp***	\$20.00 each non-taxable		\$
Total Due			\$

A Farm Fish Pond License is needed to stock your pond.

Contact DEC or the District for an application.

***A Triploid Grass Carp Stocking Permit is required by NYS DEC. Please call the District or DEC at (607) 652-7366 to ask for a permit application. Please allow at least 45 days for the permitting process.

Please note : The District is not responsible for any mortality of stock which may occur during transport. Refunds will not be given for failure to pick up your fish on the designated pick up day/time. If you cannot pick up your fish, you must make arrangements to have them picked up. We have no way to hold your fish. Size of fish subject to change dependent on growing season

SEND PAYMENT AND ORDER FORM TO:

Albany County SWCD
24 Martin Road
Voorheesville, NY 12186

NO ORDERS WILL BE ACCEPTED WITHOUT PAYMENT

There will be a \$30 charge for any returned checks.

BASS:

- Max. pond temp. during July and August is 75-85 °F
- Pond depth should be 6-8 feet
- Stocking ratio : 75-100 per acre with forage fish at a rate of 750-1000 per acre

MINNOW:

- In newly built ponds it is best to stock with minnow prior to stocking fish
- Recommended stocking ratio 750-1000 per acre

TRIPLOID GRASS CARP:

- A non-chemical method of aquatic weed control
- Some aquatic vegetation commonly eaten by Grass Carp : Coontail, Pondweed, and Milfoil
- Contact the District for informational packet

CATFISH:

- Warm or cold water
- Temperature must exceed 70°F for 2-3 weeks in order to reproduce
- Will cohabitate with most other fish
- Depending on food availability will grow 5-10 pounds

RAINBOW TROUT:

- Max. pond tem. during July and August is 65-70 °F
- Pond depth should be at least 8-10 feet
- Stocking ratio : approximately 600 fish for a one acre pond
- Trout should not be stocked with bass

Delivery : Orders will be available for pick-up at the District Office parking lot on Martin Road in Voorheesville, Friday Morning, May 18th. During the week of May 7th you will receive confirmation of your order and an exact pick up time.

If you do not receive confirmation by May 14th, please call the District ASAP.

Container Suggestion - Please bring a clean container with your own pond water, not tap or well water. Line each container with an unscented, heavy duty garbage bag and fill 3/4 full with water.

For increased survival, fish can be bagged and oxygenated for an additional fee of \$1.00 per bag (to be collected at pickup site)

Environmental Competition For High School Students

Now is the time for students and advisors to start planning for the upcoming Capital Regional Envirothon. The Envirothon is an outdoor competition that tests students' knowledge on soils, aquatics, forestry, wildlife and current environmental issues. The activities are designed to help students become action-oriented, environmentally conscious adults. In preparation for the event, students develop research skills, practice team building, and gain an appreciation for consensus decision making.

Regional Envirothons are organized by local Soil and Water Conservation Districts in partnership with school teachers and team advisors. The Capital Region Envirothon includes teams from Albany, Montgomery, Rensselaer, Schenectady and Schoharie Counties. The winning team from each county then

has the opportunity to go on to the NYS Envirothon which, in turn, determines the team that will represent NY in the National Envirothon.

This year's event will be held on May 3, 2018 at the New York State Power Authority's Visitor Center at Lansing Manor in Gilboa, NY.

Reduced Property Tax For Land in Agricultural Production

The Agricultural District Law provides for reduced property tax bills for land in agricultural production by limiting the assessment of such land to its prescribed agricultural assessment value. Owners whose land satisfies the eligibility requirements may apply for an agricultural assessment. Agricultural Assessment applies to agricultural land, which includes cropland, pasture, orchards, vineyards, land to produce maple syrup, land to produce Christmas trees, support land, and land that is used or is also categorized as agricultural land. Please contact your assessor, who will determine if you qualify and are in need of a Soil Group Worksheet.

Conservation District staff will once again be completing Soil Group Worksheets (SGW) for landowners, in Albany County, who are going to file for an Agricultural Assessment in 2017. A SGW lists the soil types you have on your property and tells how many acres of each soil group you have. The assessor will use this worksheet, along with the rest of your application, to help them determine your tax exemption. In most towns, applications must be filed with the local assessor by March 1st. Please verify this date with your assessor.

The following items are needed for the completion of your SGW:

- ◆ Current tax bill with ID number for each parcel of property
- ◆ Location of any building(s) and their use
- ◆ Location of any forestland and number of acres

For more information on the Agricultural Assessment Program contact your local assessor the Office of Real Property Services, or your local Conservation District.

The Albany County Soil and Water Conservation District offers this service by appointment only. Please call Peter Bayzon at 518-765-7923 for an appointment to have a Soil Group Worksheet completed for each parcel you wish to enroll. There is a \$25 charge for each SGW, new or revised.

Attention Agricultural Landowners : Open period for enrolling land in Albany County Agricultural Districts 1, 2, or 3 begins on February 1st and runs for 30 days. To receive an application, contact Tom Gallagher with CCE Albany County at 518-765-3500.
